## What are the Advantages of Aluminum Windows?

- **Strength and durability:** Aluminum storm windows are durable and sturdy. They have an excellent strength to weight ratio which enables them to have an array of window designs. They are three times stronger than vinyl windows and up to 50 times as sturdy as wood windows. They are suitable for commercial and residential buildings.
- **High-energy efficiency:** Aluminum conducts heat efficiently. 22 percent of heat loss occurs through poorly installed windows. Modern aluminum windows phoenix incorporates insulated frames, several glass panes and thermal breaks which dramatically increase their energy efficiency and reduce your energy bills.
- **Rotting and warping:** Aluminum windows don't rot, rust or warp because aluminum is a non-ferric metal. The latest windows have baked-on and anodized finishes which don't chalk or fade and need little maintenance.

Although aluminum windows are a great choice for homeowners, commercial property owners have also discovered their benefits. ***Business owners particularly appreciate the longevity, durability, and easy maintenance aluminum windows provide***

We're proud to say that ***our aluminum windows meet EnergyStar standards***. You can find out more about the energy ratings [here](#) by scrolling to the last page. Be sure to check out our information on [tax credits](#) to find out how installing energy efficient aluminum windows can save you even more money.

Our ***service area encompasses the greater Phoenix area***. We go east as far as Florence, AZ, north all the way up to Anthem, south to Maricopa, and we service customers as far as Wickenburg to the west. [Communities we service](#) include Surprise City, Encanto Village, Deer Valley, Blackwater, and many more

Our aluminum windows are all manufactured with high-quality materials designed to provide them with optimal protection from the elements. ***Aluminum window maintenance involves removing any moisture on the glass and frames with a soft, clean, dry cloth in order to decrease chances of erosion caused by humidity.***

Aluminum window cleaning should never be performed with products containing caustic or abrasive ingredients. A solution of mild detergent and warm water works best with sponges or soft cotton cloths, although soft-bristled brushes may be used for stubborn dirt. Aluminum window frames should be inspected every five years to see if sealants and weather-stripping needs to be reapplied.

Today's technology has made it possible for aluminum-clad windows to feature energy calculations that are very close to those of their vinyl counterparts, and as an added bonus, aluminum-clad windows are generally available at a lower price point. Ask our helpful staff to help you decide what the best frame material is for your particular needs based on your unique requirements.

Properly cared for ***aluminum windows should last about 20 years***. Because we believe in our product, we stand firmly behind it by offering customers a lifetime warranty that provides protection against defective manufacturer materials as well as faulty workmanship.

Aluminum window prices depend on a variety of factors, such as window placement, the number of windows desired, and the type of glass preferred. However, because we feel that

finances shouldn't stand between you and the windows that you want, ***we offer zero dollars down and zero interest financing on contracts that are paid off within 25 months*** .
