What Are The Color Options?

We carefully select the best aluminum windows in Phoenix for our clients.

- **Colors include white, Mojave beige, tan, and anodized bronze.** A split finish is also available.
- Combined with low-E dual-pane glass and Argon Gas, the Ambassador is **one of the most energy-efficient windows on the market today.**

What are the Advantages of an Aluminum Window?

- **Strength and durability:** Aluminum storm windows are durable and sturdy. They have an excellent strength to weight ratio which enables them to have an array of window designs. They are three times stronger than vinyl windows and up to 50 times as sturdy as wood windows. They are suitable for commercial and residential buildings.

- **High-energy efficiency:** Aluminum conducts heat efficiently. 22 percent of heat loss occurs through poorly installed windows. Modern aluminum windows phoenix incorporates insulated frames, several glass panes and thermal breaks which dramatically increase their energy efficiency and reduce your energy bills.
- **Rotting and warping:** Aluminum windows don't rot, rust or warp because aluminum is a non-ferric metal. The latest windows have baked-on and anodized finishes which don't chalk or fade and need little maintenance.
