We Own Our Business and Keep It at the Leading Edge of Window and Door Technology

At Energy Shield Window & Door Company, we've built our reputation as an expert window and door supplier to the Phoenix marketplace. We keep up to date with industry changes and needs, with corporate decisions made on-premises. As the industry has moved from a labor-intensive business model to include information technology, computer-aided design, and high-performance materials such as UV-protective glazing, we've moved quickly to remain a leader in our field. Our agility ensures that we can provide you with the latest products created, especially for your home.

We See Your Project Through From Beginning to End

Our expert craftspeople create our custom replacement windows, patio door assemblies, and plantation shutters to your exact dimensions and design requirements. We craft vinyl windows, clad wood windows, and aluminum windows with multiple panes to provide heat and noise protection. Most of the products we sell come directly from our factory, from basic replacement doors to elegant front entry models, convenient patio doors, and French doors for dining areas and private offices.

Our Team of Installers Ensures Top Results for You

Our company provides end-to-end service, so we are responsible for the entire process. Our installation teams bring the project to completion, handling even complex jobs. For instance, our process can include permit pulling, wall demolition, and careful installation of a new patio door to match your outdoor renovations.
