**Getting Exactly What You Want in Your Custom Entry Door**

---

The bottom line in custom glass entry doors is that they need to maximize curb appeal, energy efficiency, and natural light, and minimize noise and dust infiltration. They also should be easy to clean and maintain and resist corrosion. Yours should accomplish these objectives for you as it comes in on budget.

Lending to that last objective, your new custom entry door should qualify you for a home energy efficiency investment tax credit (ITC) from the IRS. Your custom entry door also must look and work ideally for many years to come. Finally, your custom entry door installation must be top quality to help ensure it will function and endure the desert elements as designed.

That's when you'll know you've got it all in one door — everything you want aesthetically and functionally at the best possible value for your dollar.

## What to Expect From Energy Shield Custom Entry Doors

---

What do you get in an Energy Shield custom entry door? Here are the structural components and finishing elements of our special custom glass entry doors:

<b>Custom Colors</b>	Energy Shield custom made entry doors are available in any configuration you can imagine, with a wide array of colors and finish types and industry-leading glass package options.
<b>Superior Energy Efficiency</b>	Energy Shield wood and vinyl framed glass entry doors are built for minimal heat transfer through both the glass panels, inner and outer door frames, and through warm spacers between glass panels.
<b>Exceptional Durability</b>	Every custom door we build is thoroughly treated for maximum protection against mold growth, sun exposure, dust infiltration, finish deterioration, and warping.
<b>Top Quality Hardware</b>	We only install hardware that is worthy of the quality of our custom home front entry doors. We use beautiful, high-durability hardware that is maximally resistant to deterioration.
<b>Cleaning and Maintenance</b>	All of our <u>vinyl clad and wood doors</u> are finished for easy cleaning and maintenance. See the instructions provided for each.
<b>Superior Warranty</b>	We offer among the best product and installation workmanship warranties in our industry, so our customers can trust their investment in their Energy Shield custom entry door.

## Wood or Vinyl Custom Glass Entry Door Framing Options

---

Any design of custom size entry doors is available in beautiful wood or vinyl clad options by Energy Shield Window & Door Company. In addition to all the above features described, either a wood or vinyl entry door offers its particular special benefits:

## Custom Wood Entry Doors

Top-quality wood door frames offer the authenticity of genuine wood doors often preferred for historic homes.

Our custom solid core wood doors offer the strength and construction quality you should expect from a fine wood door.

Replacement wood doors (and windows) can reduce energy waste through old doors and increase property values.

## Custom Vinyl Entry Doors

Impact-resistant vinyl doors are built to last. They're treated for mold resistance and durability against dents or warping.

Our optimized foam core vinyl doors offer increased sound insulation and up to 600% greater heating/cooling insulation than wood.

Vinyl doors offer all the beauty and superior functionality of other door materials at a fraction of the cost.

## Energy Shield Consultation and Door Installation Process

Free in-home door-needs analysis and design consultation

2. *Manufacture*

Build custom replacement doors

3. *Installation*

Prepare door frame, install new doors, and cleanup

4. *Support*

Provide lifetime customer service support

## Signs You Need to Replace Your Existing Door

---

The front door of your home is undoubtedly the most crucial part as it emphasizes your house and leaves an everlasting impression. Owing to its consistent usage, regular cleaning and maintenance must be ensured; however, sometimes, even that isn't enough - a replacement becomes inevitable. When such a situation arises, you should select not just based on its appearance but also for safety reasons along with its longevity and functionality.

Here are signs that indicate it's time to get new doors:

Difficulty in opening and closing your front door

Weathered, warped, or cracked door

Presence of dings and rust

Moisture between the glass panes

Water or pest damage

Safety has become a concern

## **Why Choose Energy Shield Window & Door Company?**

---

We have been manufacturing the best glass entry doors in the southwest United States for over 27 years. Buying factory direct saves our customers substantial amounts of money. Dealing directly with the manufacturer also increases installation, service, and warranty handling quality.
