

Telescoping Glass Doors in Arizona

 energysieldwindowsanddoors.com/multi-slide-doors

Energy Shield Window & Door Company offers a wide variety of telescoping multi-slide doors from several different manufacturers in Phoenix, AZ. This door style is less expensive than Bi-Folding doors while providing the same glass wall appearance. Multi-Slide doors are commonly referred to as telescoping doors or stacking doors. Generally, between 3 and 6 panels slide in one direction and stack up in front of the end panel. This type of door does not require room for the panels to swing inward or outward as Bi-Folding doors do.

Our most popular and affordable stacking sliding door is the Ambassador 8880 Series. This model is constructed of heavy-duty Architectural Grade Aluminum and is thermally broken for superior energy savings and performance. The Ambassador 8880 series is typically 60% less expensive than other brands in comparable sizes, making the Ambassador the absolute best value in the multi-slide category.

Multi Sliding Glass Doors with an Ultra Slim Line Frame

Arizona is known for its beautiful panoramic views, from soaring mountaintops to desert sunrises. Energy Shield Window & Door Company created the Mega View Door with an Ultra Slim Line Frame, so homeowners can enjoy the beautiful nature. The Mega View Door with an Ultra Slim Line was designed for brand new luxury homes. This Multi-Slide Door (*also known as a Sliding Glass Wall*) is a great way to enjoy the scenery, get some fresh air, and save on energy costs.

Features and Benefits of Multi Slide Patio Doors

There are many reasons many architects and home builders are choosing to incorporate Sliding Glass Walls into their luxury homes. The Mega View Door with an Ultra Slim Line Frame is highly versatile and is designed to meet the latest trends in aesthetics, insulation, and security. The door is well suited for architectural applications where large openings are available such as off a balcony, living room, or dining room.

- The thermally broken aluminum frame around the door is only 3/4 of an inch thick and is available in a wide range of colors, as well as custom colors to meet anyone's needs.
- Choose 2 panels, 3 panels, 4 panels, 5 panels, or 6 panels for the glass door.
- There are three glass options: single, double, or triple pane glass for energy efficiency and sound insulation. There are single and double-glazing options for optimal energy efficiency.
- Squared beading gives the glass a very sleek, modern look while the glass pane is also tough enough to stand up to all types of weather conditions in Arizona.
- Multi-Slide Doors provide alternatives to traditional walls, sunrooms, and room dividers. Some architects use them for large outdoor openings while others put them as dividers between rooms, where homeowners open and close them as needed for different events.

Why Should I Install Multi Slide Doors in My Home?

Multi-slide patio doors take the whole patio door concept to the next level. The sleek and expansive folding glass systems usually consist of more panels than a traditional 2 or 3 panel sliding glass door. Multi slide patio doors can feature up to 10 panels that open from either side to the other or from the middle outward. There are various reasons Arizona homeowners increasingly choose multi-slide doors. The most popular motivation is to have an uninterrupted view of the Sonoran landscape.

Increase Visibility

As you have probably seen, traditional patio door models, including sliding glass doors, cannot provide complete visibility. They typically have full metal or wood framing around the panels, which partially obstruct the view through the doors. By contrast, the innovative technology of multi slide doors allows a full panoramic view of the desert landscape from inside your Arizona home.

Upgrade Your Expression of Your Style

Stunning multi slide doors can extend the entire length of a large deck or patio, to create a fully indoor-outdoor living space. This unique door option is arguably today's most exciting and transformative option in patio doors. You can vertically stack the panels to open up an extensive wall space even wider.

Bring in More Natural Light

The great expanse of a whole wall of multi-slide patio doors, as many as 10 glass panels, opens up living space to a flood of natural light. You may have seen a 3 or 4 panel sliding glass door. Those look great. But the huge glass walls created by assembling a series of

multi slide doors cannot be surpassed for panoramic views of the gorgeous southwest desert, majestic mountain ranges, and the open sky.

Improve Versatility and Convenience of The Living Space

The panels of a multi slide door system are designed to open up and fold into recesses. The panels disappear into the pocket, concealing the panels to create the widest possible openings. That combines your indoor and outdoor living spaces. This amazing option provides ideal versatility for entertaining. The panels can also be opened and closed manually or with an automatic multi slide door control. The tracks can also be installed straight, curved, or at a 90-degree corner angle.

- Unparalleled design flexibility
- The ability to extend to 10 glass door panels
- The option to open from either side or from the middle
- The option for automatic operation control

Increase Your Property Value

Upgrading a home with new doors and windows is a timeless strategy for improving comfort, elevating style, and increasing property values. The resale value of a home upgraded with multi-slide doors can increase significantly. The multi-slide doors transform a home's interior style and upgrade its curb appeal. Your new multi-panel sliding doors are all backed by the outstanding Energy Shield warranty.

Frequently Asked Questions About Multi Slide Doors

What Are Telescoping Sliding Glass Doors?

Many homeowners ask, "what are telescoping doors?". Telescoping doors save space and provide a wider clear door opening - perfect for greater access to patios or large areas where people congregate. These doors feature moving walls of glass frame that allow for beautiful landscape views and loads of fresh air and natural light.

Telescopic sliding doors feature large sliding glass panels that provide an unobstructed view to the outdoors. These doors slide smoothly on stainless steel running tracks installed on the upper and lower wall openings and will glide into wall pockets. The result is an extra wide wall opening that removes the barrier between your home's interior and your outdoor landscaping. Homeowners experience the sense of an expanded living space that incorporates a beautiful view of nature, and allows for plenty of fresh air and natural light to flow in.

How Much Do Multi Slide Doors Cost?

The cost of purchasing and installing multi-slide doors varies widely, of course. It is based on the panel dimensions, the number of panels, the framing material, the performance features you choose for the glass package, and other options for your door system.

What is constant in the pricing is the savings homeowners realize by buying factory-direct from Energy Shield. There is no retail markup, and there is no low production quality to increase profit. We frequently offer special discounts, and with this caliber of glass door product, you are eligible to claim the substantial federal ITC credit for residential energy efficiency investment.
