

# Telescoping Glass Doors in Arizona

---

 [energyshieldwindowsanddoors.com/multi-slide-doors/](https://energyshieldwindowsanddoors.com/multi-slide-doors/)

***Energy Shield Window & Door Company offers a wide variety of telescoping multi-slide doors*** from several different manufacturers in Phoenix, AZ. This style of door is less expensive than Bi-Folding doors while providing the same glass wall appearance. ***Multi-Slide doors are commonly referred to as telescoping doors or stacking doors.*** Generally, there are between 3 and 6 panels that slide in one direction and stack up in front of the end panel. This type of door does not require room for the panels to swing inward or outward like Bi-Folding doors do.

Our most popular and affordable stacking sliding door is the Ambassador 8880 Series. This model is constructed of heavy-duty Architectural Grade Aluminum and is thermally broken for superior energy savings and performance. The Ambassador 8880 series is typically 60% less expensive than other brands in comparable sizes, making the Ambassador the absolute best value in the multi-slide category

## Multi Slide Door with an Ultra Slim Line Frame

---

Arizona is known for its beautiful panoramic views, from soaring mountaintops to desert sunrises. Energy Shield Window & Door Company created the Mega View Door with an Ultra Slim Line Frame, so homeowners can enjoy the beautiful nature around them. The Mega View Door with an Ultra Slim Line was designed for brand new luxury homes. ***This Multi-Slide Door (also known as a Sliding Glass Wall) is a great way to enjoy the scenery, get some fresh air, and save on energy costs.***

## Features and Benefits

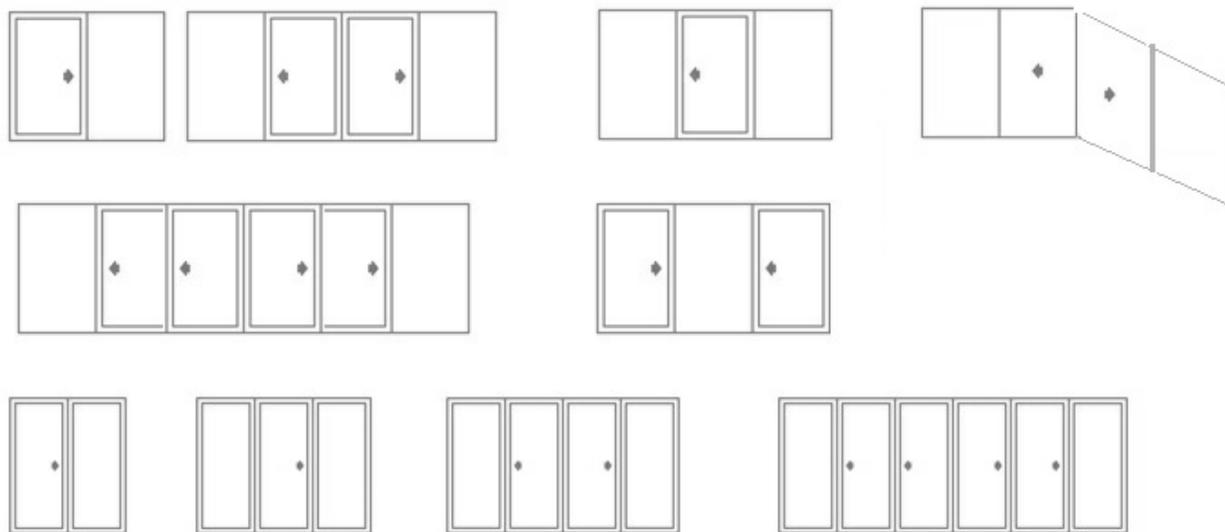

---

There are many reasons many ***architects and homebuilders are choosing to incorporate Sliding Glass Walls into their luxury homes.*** The Mega View Door with an Ultra Slim Line Frame is highly versatile is designed to meet latest trends in aesthetics, insulation, and security. The door is well suited for architectural applications where large openings are available such as off a balcony, living room, or dining room.

- The thermally broken aluminum frame around the door is only 3/4 of an inch thick and is available in a wide range of colors, as well as custom colors to meet anyone's needs.
- Choose 2 panels, 3 panels, 4 panels, 5 panels, or 6 panels for the glass door.
- Three glass options: single, double, or triple pane glass for energy efficiency and sound insulation. There are single and double-glazing options for optimal energy efficiency.
- Squared beading gives the glass a very sleek, modern look while the glass pane is also tough enough to stand up to all types of weather conditions in Arizona.

**The Multi-Slide Door provides alternatives to traditional walls, sunrooms, and room dividers.** Some architects use them for large outdoor openings while others put them as dividers between rooms, where homeowners open and close them as needed for different events.

Many homeowners ask, "what are telescoping doors?". Telescoping doors save space and provide a wider clear door opening - perfect for greater access to patios or large areas where people congregate. These doors feature moving walls of glass frame that allow for beautiful landscape views and loads of fresh air and natural light.

Telescopic sliding doors feature large sliding glass panels that provide an unobstructed view

to the outdoors. These doors slide smoothly on stainless steel running tracks installed on the upper and lower wall openings and will glide into wall pockets. The result is an extra wide wall opening that removes the barrier between your home's interior and your outdoor landscaping. Homeowners experience the sense of an expanded living space that incorporates a beautiful view of nature, and allows for plenty of fresh air and natural light to flow in.

Yes, Keltic offers both, manual and motorized telescopic doors along with remote controlled options that allow you to easily open and lock doors. Our standard doors feature an automatic sliding door operator with motion sensors to detect an occupant passing through the entryway. Motorized open and close allows you to easily take advantage of beautiful weather with just the touch of a button.

Yes, Telescoping French doors feature 2 sliding glass doors that close at a center point and have multiple panels on each side. These are available in a range of styles to suit both residential and commercial needs. Constructed with multi-point hardware, stainless steel handles, and a dead bolt lockset for maximum security. Add a touch of Olde World glamour to your home with telescoping French doors available with one panel or two panel operation.

Consider telescoping patio doors available in 3 finishes - Dark Bronze Anodized, Clear Anodized and White Painted frames. For your specific interior design needs, we can provide additional finishes when requested. All doors feature a block frame, Dark Bronze or Silver finish spacers and spectrally selective Low-E coating for greater energy efficiency and 1/4" tempered glass for safety.

Yes, our pocket door system features multiple panels that easily collapse into the wall - hidden away and giving an appearance of a totally open space. For modern decors or a minimalist, open floor plan, stacking glass doors that operate at a 90-degree angle allows for spectacular, unobstructed views. These doors feature Architectural Grade Aluminum and the option of 1 to 4 linkable tracks.

Yes, for those that desire clean lines and a minimum of obstruction, we offer stacking sliding doors that disappear into the wall cavity - creating the perfect passageway between your home and the outdoors. Obtain the illusion of a larger space and maximum transparency, as these doors feature a minimum of framing and the largest panes of glass.

Yes, see our multi-slide glass doors are energy efficient to keep you cool in the Arizona heat. The bottom floor track has a water barrier sill and weep-hole system as safeguards against water intrusion. For additional protection, the back leg of each sliding panel penetrates the track to help keep out dust and debris.

Yes, telescoping sliding doors includes multi-point heavy-duty hardware for maximum security and external keyed locking system. Stacking French doors come with a deadbolt lockset for greater strength and security against intrusion.
