

Why Choose Casement Windows?

 energysieldwindowsanddoors.com/why-choose-casement-windows

Dating back to medieval times, the casement window was the very first operable window ever used. Hinged on either side and opening outward using a crank handle, ***casement windows have the ability to open wider than any other window style at 90 degrees.*** With maximum airflow, these windows make a stylish addition to any room in your home or office to provide instant access to fresh air with unobstructed ventilation.

Today, ***casement windows are an ideal option for hard to reach areas because of their easy operation and low maintenance.*** If you are in the market for new or replacement windows, consider the superior engineering of the modern high-quality casement window with features like weather resistance, durability, excellent security and energy efficiency. In general, ***casement windows have lower air leakage rates than sliding windows*** due to the fact that the sash closes more firmly by pressing against the frame, according to [energy.gov](https://www.energy.gov).

Energy Shield Windows and Doors in Phoenix, AZ has perfected premium vinyl technology for our wide selection of casement windows over the last twenty years. **Made in the USA**, our superior casement windows are ***certified @energy-efficient*** with specially designed heat reflective glass for ***big savings on your energy bill.***

Benefits of Casement Windows

Homeowners with casement windows installed above countertops, over a sink or appliance or in a small bathroom enjoy the benefits of easy usability with sashes designed to open vertically instead of horizontally. ***This versatile window is second only to a fixed-pane window when it comes to energy efficiency*** and can even be fitted with automatic openers. The many benefits of selecting a casement window manufactured to the differing specification for the climate you live in include:

- **Durability**— Casement windows feature ***welded framing and sashes with an air-tight seal and weather stripping on the exterior*** to provide optimum protection from weather conditions.
- **Energy Efficiency**— Homeowners experience ***cost-saving energy efficiency with reflective glass for protection against harmful UV rays, Insulated glass to retain both heat and cold and an air-tight seal.***
- **Exceptional Security**— The ***dual operating arms and high-grade locking mechanism found on casement windows offer maximum security*** and protection for your family.
- **Low Maintenance**— The ***interior screens of casement windows remain cleaner, longer*** because they are not exposed to the buildup of debris that accumulates on the screens of all other operable windows.

Customize Your Casement Windows to Reflect Your Style

This old-world style window will give any room in your home or office an updated look with modern features and a wide array of cladding options. ***Choose the material and color options to blend aesthetically with the interior of any room in your home*** and present a flawless, uniform look on the exterior with options like:

- **Wood Casement Window Options**
- **Vinyl Casement Window Options**
- **Aluminum Casement Window Options**
